- 10 Click Next on Add trust anchor
- 11 New Organization - login with ABM Admin account
- 12 Pick Don't show any of these steps
- 13 Choose the WiFi profile created in Step 3
- 14 Enter macOS password and click Erase if prompted
- 15 Get the serial number from the device
- 16 Login to ABM at <https://business.apple.com>
- 17 Click Devices on the left sidebar
- 18 Search for device by serial number
- 19 Click Edit MDM Server
- 20 Pick MDM server, wait for Assigned status

Steps 1-3 Download, WiFi Profile & Apple Configurator Setup

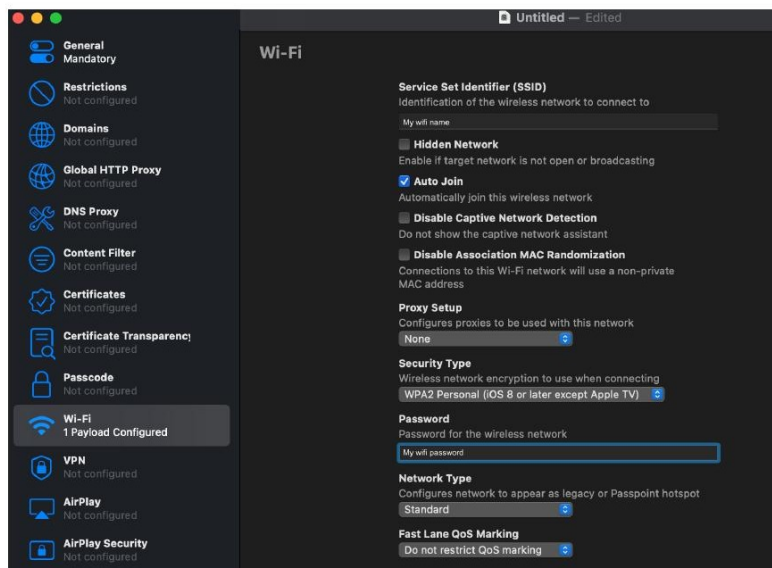

1. Download Apple Configurator from the Mac App Store.

2. Create a wifi profile so the iOS device can talk to the internet. This needs to be a network the iOS device can reach (in range)

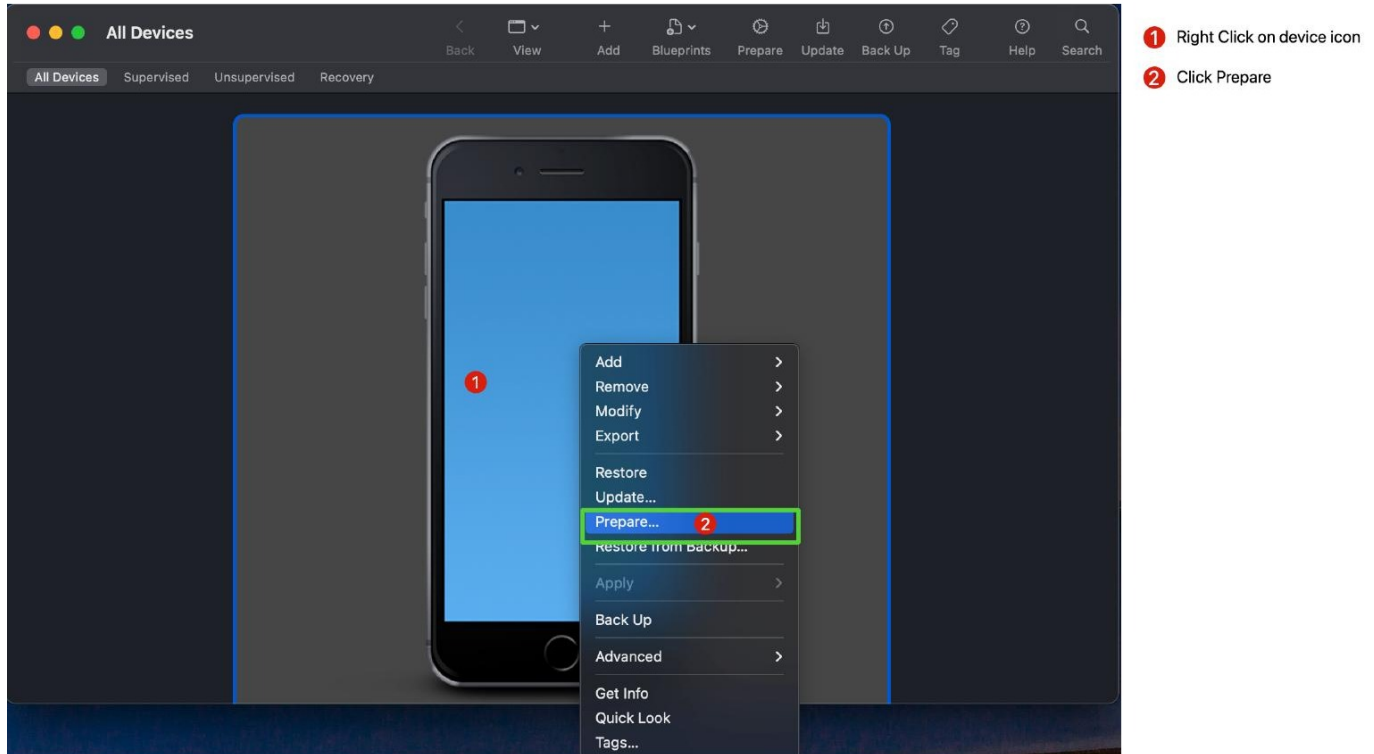

3. Setup your wifi profile and save for later use in Apple Configurator.

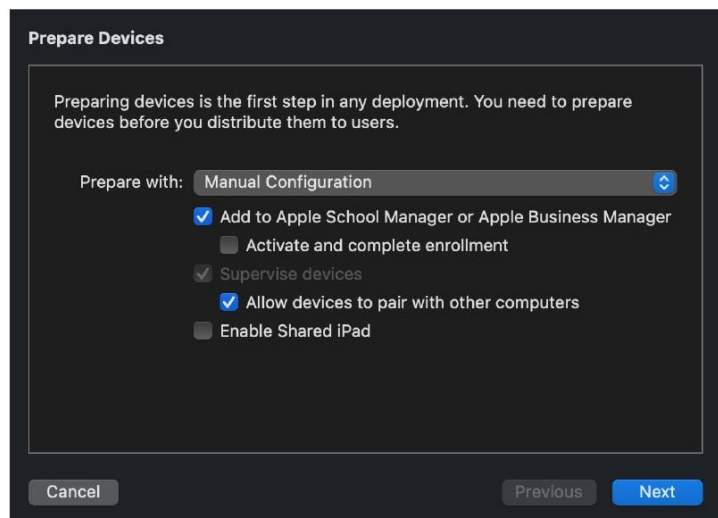

Steps 4-6 Connect Device, Prepare & Initial Settings

4. Connect the iOS device to your Mac via the charging cable.
5. Right click on the iOS device icon and click Prepare.

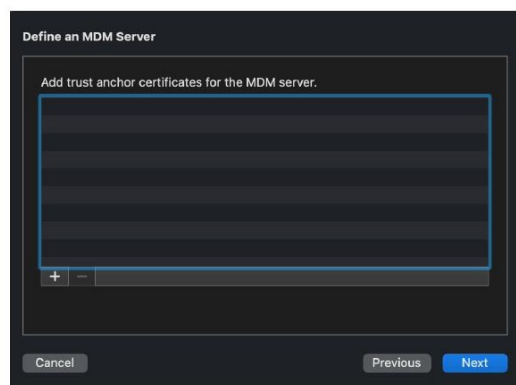

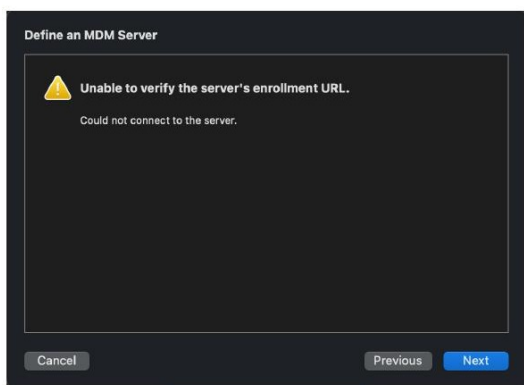

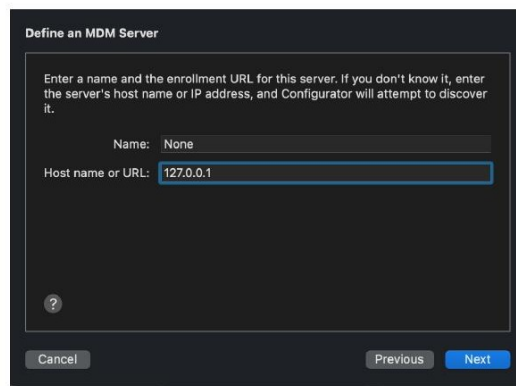

6. Pick these settings.

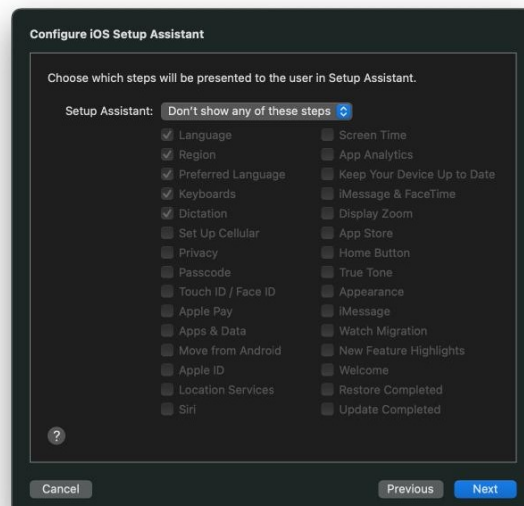

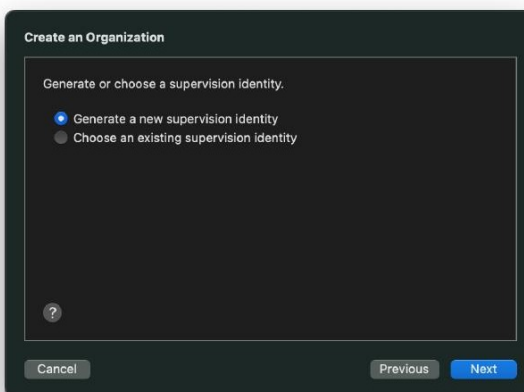

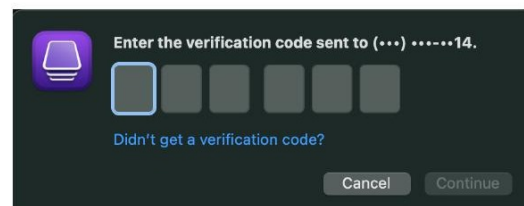

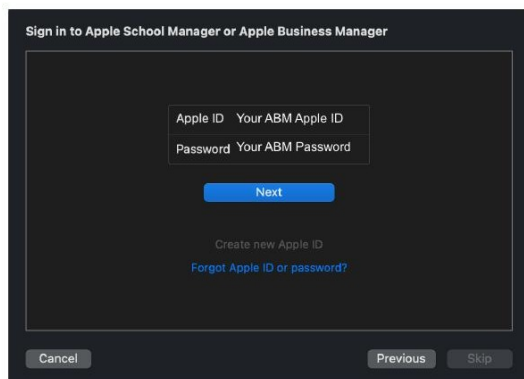

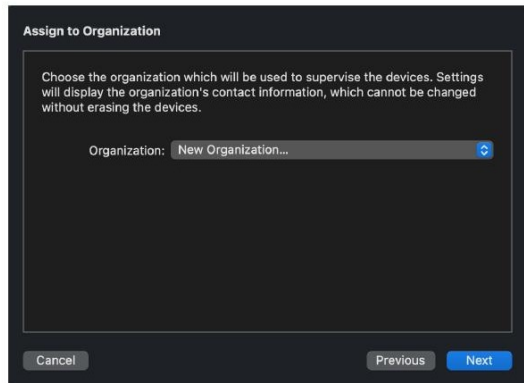

Steps 7-10 Server Configuration & Trust Setup

7. Pick New Server and click Next.
8. Type in any address as we aren't going to use this server since we are just sending the device up to Apple Business Manager (ABM) click Next.
9. Click Next on Unable to verify the server.
10. Click Next on Add trust anchor

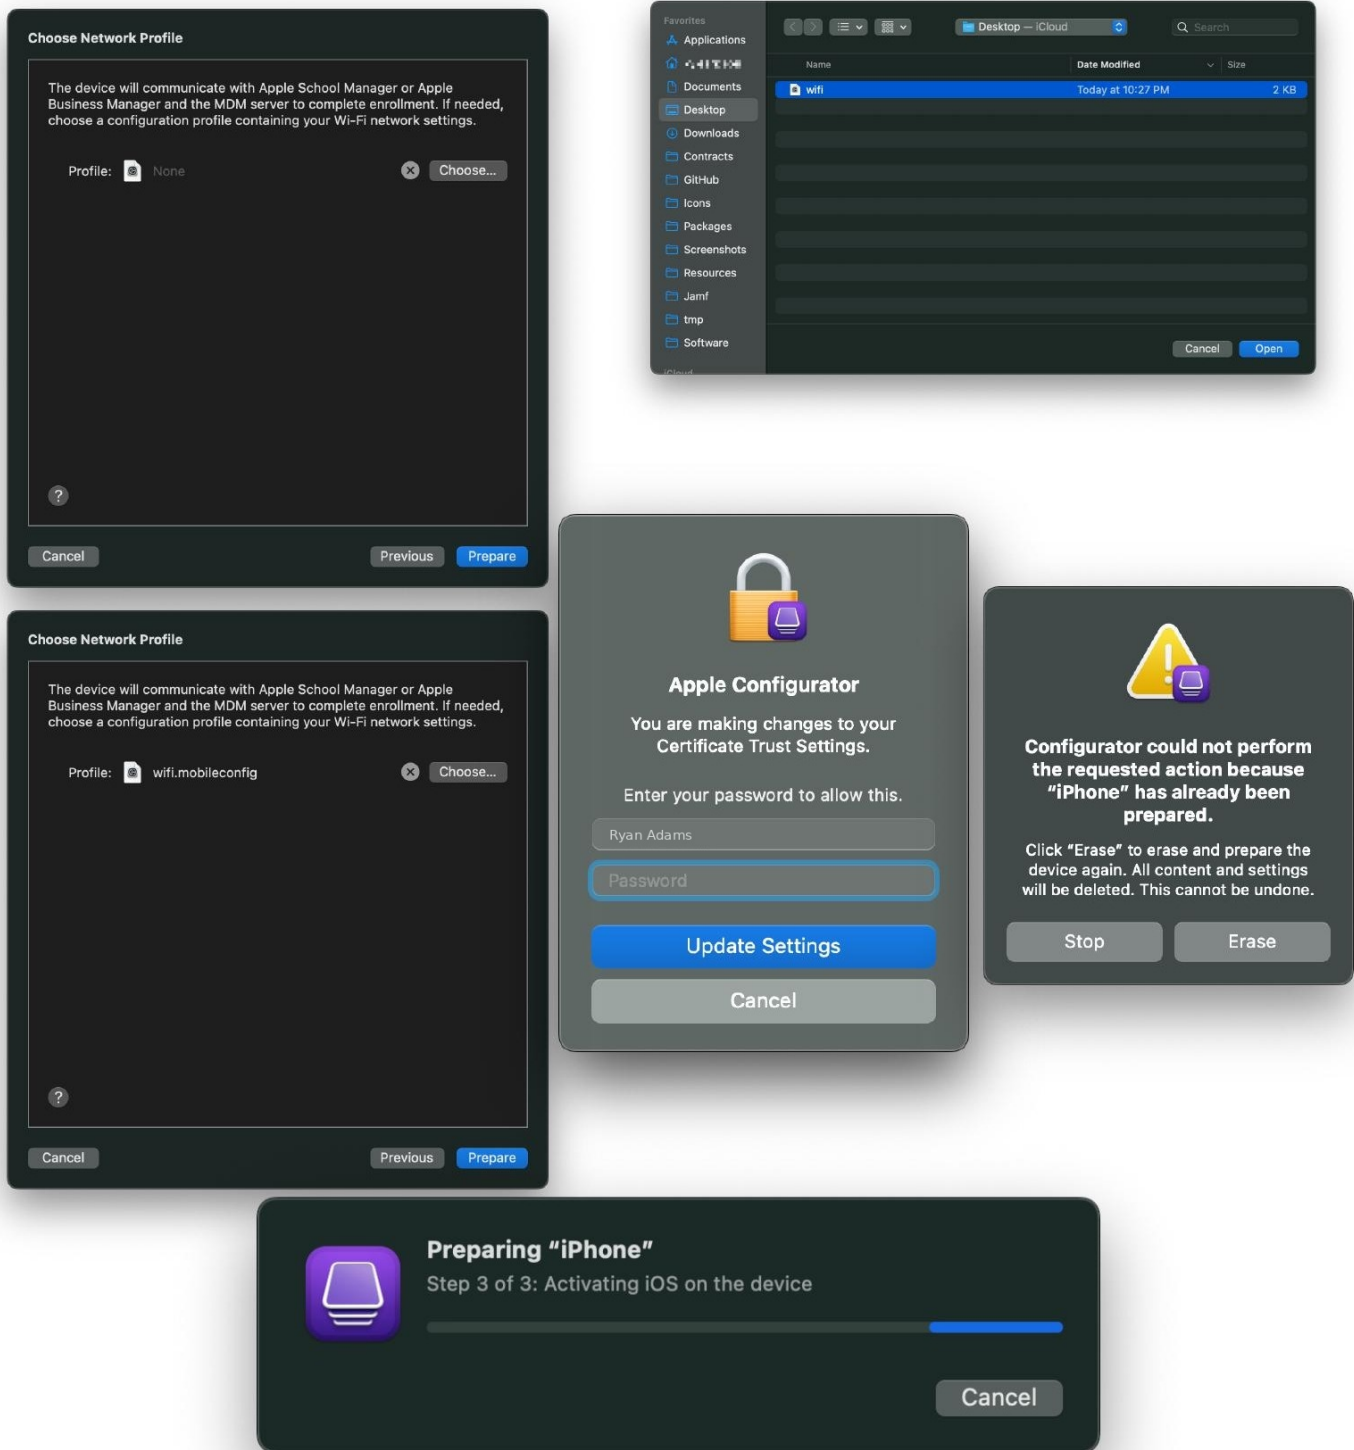

Steps 11-12 Organization Login & Setup Assistant Options

11. Click New Organization and login with a ABM Admin or Device Manager account.
12. Pick Don't show any of these steps.

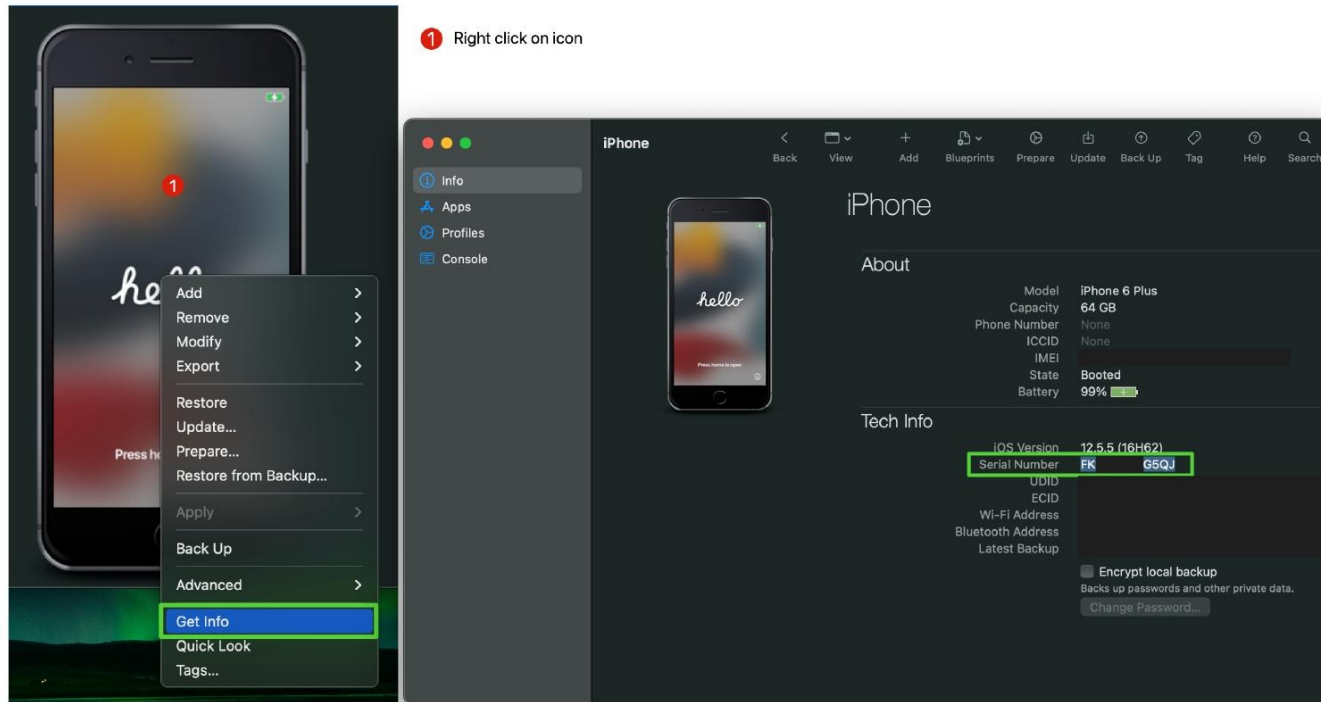

Steps 13-14 Choose Network Profile & Erase Device

13. On choose a network pick the profile you created in step 3.
14. Type in your macOS password when prompted and click Erase if prompted.

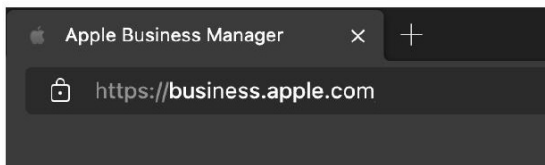

Steps 15-17 Get Serial Number & Login to ABM

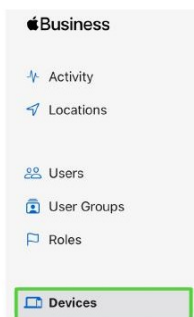

15. Get the serial number from the device to search for it in ABM

16. Login to ABM <https://business.apple.com>

17. Click Device on the left side bar.

Steps 18-20 Search ABM, Assign MDM Server & Complete Setup

18. Search for your device by serial number in ABM.
19. Click Edit MDM Server.

Continue

Edit MDM Server assignment

Select which MDM you would like to manage this device.

- Assign to the following MDM:

MDM Server

- Unassign from the current MDM

Cancel

Continue

Are you sure you want to change the MDM server this device is assigned to?

Assignment changes will take effect the next time the device uses Automated Device Enrollment in Setup Assistant.

Cancel

Confirm

Now wait until the iOS device syncs to your MDM and says it “Assigned” then go through the Apple Setup Assistant screens.
